

• AS5750L Refrigerant Leak Detector

Product No.: AS5750L

Introduction: This gas leakage detector is used to detect all halogenated refrigerants gas, but is not limited to CFCs, HCFCs, HFCs. It can test with less than 0.5oz/yr high sensitivity. It is widely used to detect leakage in air-conditioning, freezing systems, etc.

FEATURES

Compact Size: with light weight, is easy to carry and use with flexible stainless probe for all application.

High Quality: enhanced electronic circuitry.

Fast: with super sensitive and exclusive scan mode, can responds to minute traces of halogen gases and rapid warm up.

Function: can detect all kinds of halogen refrigerant gas, not is not limited to CFCs HCFCs and HFCs.

Convenience: with LED leak size indicator and power status indicator.

SPECIFICATIONS

Detection Gas	All Refrigerant Gas
Sensitivity	Less than 0.5oz/yr
Response Time	Instantaneous
Warm-Up Time	less than 20 Seconds (25°, 60%RH)
Continuous Operation Time	9 hours (slightly vary with operation)
Low Battery	2.8V ± 0.2V
Operating Temperature	0~50°
Environment	80%RH (Non gel)

PACKING INFORMATION

Power	3 x 1.5V AA Batteries
Product Net Weight	173g
Product Size	165 x 63 x 30mm
Packing	Gift Box
Standard Quantity Per Carton	10
Standard Carton Size	230 x 140 x 32mm
Standard Carton Gross Weight	212g
