

GF-856, GF-858 ARBITRARY WAVEFORM GENERATORS 25 MHz, 125 MS/s, USB, RS-232

The multifunction generators **GF-858** (25 MHz) and **GF-856** (5 MHz) which combines Arbitrary Waveform and Function Generator, uses DDS (Digital Data Storage) technology to offer two programmable signals in a 4 inches LCD colour screen. All basic waveform are pre-programmed.

Besides using the front panel keyboard for programming, the program can be enhanced in the PC and send it through USB. (also RS-232 in the model **GF-858**).

One feature that makes the generator especially interesting is the possibility of playing all types of analog and digital modulations: AM, FM, PM, FSK and perform sweeps and burst. The instruments also have an input for external modulation and external clock input. They include a 6 digits frequency counter up to 200 MHz.

- ✓ 4" high resolution (480 × 320 pixels) TFT LCD display
- ✓ Advanced DDS technology
- ✓ Sample rate 125 MS/s
- ✓ Frequency resolution 1 mHz
- ✓ Vertical resolution 14 bits
- ✓ Waveform record length 1 M
- ✓ 5 basic waveforms and 45 built-in arbitrary waveforms output
- ✓ Standard interface USB port
- ✓ PC software included

CREATE YOUR OWN WAVE FORMS USING THE PC SOFTWARE AND GENERATE THEM IN THE INSTRUMENT
